Annex I

Specimen impression of the stamp used for the issue of movement certificates EUR.1 and EUR-MED

Above you find specimen impressions of stamp used by the Norwegian customs authority when endorsing movement certificates EUR.1 and EUR-MED for Norwegian exporters. It should be added that all customs offices in Norway are authorised to stamp (endorse) movement certificates EUR.1 and EUR-MED upon exportation of originating products to a partner country. The customs stamps to be used have the same layout throughout the country; however, the code-number varies, identifying the different customs offices. Thus, the numbers "1601" and "Oslo no. 12" appearing in the stamps are just examples.

Electronic EUR.1

Norwegian Customs introduced electronic EUR.1 on 2 April 2020. Below is a specimen impression of the red box located on the bottom left and upper right side of the certificate with the unique reference number and the date and time of issuance.
