SWITZERLAND¹**Approved Exporters**

The authorisation number of an approved exporter is composed of a one to five-digit number. Authorisation numbers with one or two digits are usually indicated on origin declarations preceded by zero(s), sometimes followed by the year of issuing (for instance: 11, 011, 0011, 00011 or 11/2018, 011/2018, 0011/2018 or 00011/2018).

¹ As the Principality of Liechtenstein is bound to Switzerland by the Customs Treaty of 1923, the present notification is consequently valid also for Liechtenstein.

ICELANDApproved Exporters

The Identification numbers for approved exporters authorised by Iceland are constructed as follows:

Four digits number, dash, IS, followed by the two last digits of the year of the authorisation:

Example: 0023-IS10

A list of approved exporters in Iceland is available on the internet. The list is updated on a regular basis and can be found on the following web-address:

A list of approved exporters in Norway is available on the internet. The list is updated on a regular basis and can be found on the following web-address:

Specimen impression of stamps used for the issue of movement certificates EUR.1 and EUR-MED

Above you find a specimen impression of stamps used by Norwegian customs authorities when endorsing movement certificates EUR.1 and EUR-MED for Norwegian exporters. It should be added that all customs offices in Norway are authorised to stamp (endorse) movement certificates EUR.1 and EUR-MED upon exportation of originating products to a partner country. The customs stamp to be used has the same layout throughout the country; however, the code-number varies, identifying the different customs offices. Thus, the number "1601" appearing in the stamp is just an example. The different Norwegian stamp numbers are listed below.
